Headteacher : Mrs L. Gasser, BEd (Hons), NPQH

Dear families of Southbourne Junior children,

Lunch with a Scientist

Thank you to everyone that took part in the 'Lunch with a Scientist' event last academic year. The children loved all of the sessions and learnt some amazing things. This year I hope to continue to engage the children in thinking more about STEM (Science, Technology, Engineering and Maths) roles and careers in our local community.

I am reaching out again to ask if any parents/carers/grandparents who work in jobs linked with STEM would like to take part in 'lunch with a scientist' for the new academic year. This would involve children within the school signing up to eat their lunch with you and to take the time to learn all about your job, how you got into it and its link to STEM. This would be a monthly event and would start from November to allow volunteers to be contacted.

Examples of jobs could be:

• Engineer • Nurse • Doctor/GP • Computer programmer • Vet • Biologist	• Pharmacist • Chef - link with food technology (reversible and irreversible changes) • Game Developer • Website Design • Mechanic
--	--

If you would be interested in taking part in this project please fill in the details below by **Friday 16th October**. I will then get back to you as soon as possible with a month and potential dates.

Kind regards,

Miss Wadey.
